Summary of Risk Factors

AAPL: The Company's business, reputation, results of operations, financial condition and stock price can be affected by a number of factors, whether currently known or unknown. Past financial performance should not be considered to be a reliable indicator of future performance. This discussion of risk factors contains forward-looking statements.

MSFT: Our operations and financial results are subject to various risks and uncertainties that could adversely affect our business, operations, financial condition, results of operations, liquidity, and the trading price of our common stock. We face intense competition across all markets for our products and services.

AMZN: The events and consequences discussed in these risk factors could, in circumstances we may or may not be able to accurately predict, recognize, or control, have a material adverse effect on our business, growth, reputation, prospects, financial condition, operating results, cash flows, liquidity, and stock price. These risk factors do not identify all risks that we face.
